## WHAT WE BRING

- laptop & audio-interface / external sound card
- 2 microphones Shure SM 58
- guitar
- diverse synthesizers
- keyboards, diverse midi-controllers, cables etc.
- 8 adapters symmetric Jack male to XLR male

## WHAT WE NEED

- 2 microphone stands
- 2 monitor boxes
- 8 XLR cables
- black molleton (to put around the tables)
- 2 tables approx. 1 x 1.5 - 2 m large and at least 1 m high (important because keyboard is played on them)

Preferably no party benches, but if there is no other option, something must be provided to bring the tables to 1m height (boxes, trestles, etc.)

To keep care of our environment we generally travel by train. This is why we can not bring our own tables.

In case you do not have two fitting tables, please let us know early (mischgewebe@gmail.com / Bill: +41 78 699 80 16) and we will see together what is the best solution, we can be very flexible ;-)

## FURTHER INFORMATIONS

We do not yet travel with our own sound engineers, neither for monitoring nor for FOH mix. We would be very happy if you could provide us a audio engineer.

All our sound is running through the laptop. Also guitar, synths and vocals (everything actually) goes first into our sound card were we add effects from the computer (Ableton Live).

The sound enigneer simply gets 8 tracks from the sound card to mix. The sound card has balanced Jack-outputs. We bring adapters to XLR or a multicore cable if this is preffered. Then the channels can easily cbe onnected to the stage box, we just need XLR cables from you.

### THE 8 CHANNELS ARE:

1 kick

2 snare

3 hihat & Percussion

4 bass

5 guitar

6 vox

7/8 synths (stereo pair)
